

# Why Christie?

Student health insurance is our focus. Our mission is to advance the well-being of college students. We do that by offering affordable student health insurance plans, committing to ongoing industry research and providing unparalleled customer service.

## Student health experts

We are experts committed to finding new solutions in student health care. Our fresh thinking is complemented by decades of collective experience and technical expertise in all facets of student health: plan design, utilization analysis, operations, healthcare trends and regulatory updates. As you tackle new challenges in student health care, know that you have a strategic partner with the intellectual agility to help you every step of the way.

## Students come first

Students aren't just members to us. They're real people who need real help with their unique needs. We treat them how you treat them — with support, concern and transparency. Because we know that for students to be front and center, someone needs to have their back.

## The Christie Institute

Our commitment to thought leadership is evidenced by our affiliate, The Christie Institute. Experts in health care, higher education, insurance and public policy team up with university leaders to discover creative solutions that promote the physical, mental and behavioral well-being of college students.

## Trusted partners and networks

Providing high quality health care means working with trusted partners and networks. We're proud to partner with Tufts Health Plan's network in Massachusetts and Rhode Island. Outside of MA and RI, students will have access to Cigna's network of nearly 1 million providers. Plus, students have access to the nation's largest pharmacy network through our relationship with CVS Caremark.

## Information, simplified

We believe in sharing knowledge, not inundating you with confusing jargon and terminology. You deserve the information you need when you need it in a way that makes sense to you. Our innovative technology offers instant information, maximum efficiency and 24/7 access to check claims, input referrals or search for a provider. You don't need to be an insurance expert to get expert support.

We'd love to hear from you
